

Meeting 02.03.2017

Thursday, 2 March 2017

11:00

We use BGR images, so that `cv2.imshow('nameoffigure',img)` shows the correct image, `plt.imshow(img)` will show it in a funny way

Package:

- H5py
- OpenCV
- Keras
- Keras-vis
- Hyper-opt
- Pickle
- Tensorflow
